OBJECTIVE

Senior Full Stack Developer with 7 years in the following programming languages: Javascript, Python, C#, Java and about the frameworks: React, Angular WordPress, Shopify, Laravel, CodeIgniter, NodeJS, ReactJS, ASP.NET, Django. I am familiar and experience with Web and Mobile Applications and have worked on Python Engine with a good number of successful development teams. Creative Idea and Passion Work is my conductivity in programmings.

WORK EXPERIENCE

Senior Full Stack Developer   VisioLogix

2019 - 2021

VisioLogix Corporation is a technology company focused on video capture and large data management solutions for fixed and mobile assets for both on premise and cloud. VisioLogix has been providing unsurpassed customer care and innovative products for transportation, law enforcement and private security since 2004.

Achievements:

Built a Web-based application for select objects in video and track it (optionally BLUR). Also developed Engine for Object Detection and replaced it instead of microsoft service.

- Object Detection and Blur in Video
- Audio to Text in Recordings
- Websites for Select, Edit, Render Video

Technologies used:

(React) (Django) (OpenCV) (NodeJS) (PostgresSQL)

Full Stack Developer   Sky-Learn

2017 - 2019

SkyLearn provides the highest quality online learning available. They offer a variety of courses, exam preparation and other educational tools designed to ensure you obtain your initial certification or meet your continuing education requirements. The courses allow you to achieve excellence while preparing on your own schedule.

Achievements

As an administrator, I managed and upgraded admin website for customers and support service and manage feedback for business
